

OCTARINO

The **OCTARINO** harmonizes negative radiation influences. It is characterized by its high effectiveness in the field of various electrosmog influences and has the same qualities and properties as its «big brother» **OCTARION**, but with a smaller range of action.

It harmonizes negative radiation influences of:

- mobile phones, wireless phones, WLAN etc.
- (directional) rays of radar stations
- mobile radio transmitters
- HAARP

The building/terrain to be harmonized must lie completely within the field of action.

For all wireless devices use **FOSTAC OMNI CHIP** or **ELECTRIC Plates (MINI, A6 or A5)**. The negative effects of the internal power network can be harmonized with **ELECTRIC plates (A6, A5 or A4)**.

The personal sensitivity of the user is decisive when selecting the product. Our consultants are happy to assist you.

Additional costs for transportation are incurred due to size and weight.

TECHNICAL DETAILS

Material: Glass, socket made of granite or white marble

Size: 74.5 cm, socket 25 x 17.5 cm

Weight: approx. 24 kg net
