

SANA LEA OMNIGOLD

The three-dimensional tree of life **SANA LEA OMNIGOLD** harmonizes the electrosmog (incl. 5G) penetrating from outside.

In principle, it is installed in the centre of the residential property. If the building is affected by a directional beam, the SANA LEA OMNIGOLD should be placed at the entry point of the beam.

For all wireless devices use FOSTAC OMNI CHIP or ELECTRIC Plates (MINI, A6 or A5). The negative effects of the internal power network can be harmonized with ELECTRIC plates (A6, A5 or A4).

The personal sensitivity of the user is decisive when selecting the product. Our consultants are happy to assist you.

Utmost care should be taken that the SANA LEA is hung up properly, as it can cause serious injury in case of dropping. We will not assume any responsibility for products that are hung up carelessly.

Do not hang the SANA LEA in parts of the room where people walk or sit.

This product is supplied with an acrylic stand. A wooden stand is available at extra charge.

TECHNICAL DETAILS

Material: Glass

Size: 148 x 60 x 12 mm
