

TRIANA ROD

The **TRIANA ROD** is mainly used for earth healing. It is buried in the ground, including a **HEMISPHERE LILAC**. Additionally the **TERRA SET** is combined. This formation is used to energize large area sections and premises.

The affected flora and fauna, but of course also humans, benefit from a very high harmonic energy vibration. It is possible to promote the creation of new places of power.

The depth of the hole for the TRIANA ROD depends on the terrain: In agricultural areas it is recommended to maintain a depth of approx. 80 cm, otherwise approx. 20 cm is sufficient. To make the holes, it is easiest to use a 2 m steel rod or crow bar (4 - 5 cm diameter).

The **TERRA SET** spheres are buried in a circle at a distance of approx. 1 m in an octagon or dodecagon.

TECHNICAL DETAILS

Material: Glass

Size: 330 mm, Ø 30 mm
